

ScoboVault - Product Vision & Wireframes

This document presents a detailed product overview with visuals, combining the strategic vision and initial wireframes for the ScoboVault product ecosystem.

Hora Certa

Description: An intelligent booking and scheduling system designed for individual professionals, small businesses and service providers. Enables real-time availability, calendar sync, reminders, and revenue tracking. The project is in Portuguese because for the initial launch it will be in Portugal and Angola, because I have strong contacts there.

Vision: To become the default booking tool for independent workers in emerging markets.

Verbum

Description: A gamified multilingual learning platform powered by AI, combining audio, visual, interactive and community-based modules to accelerate language acquisition.

Vision: To be the Duolingo-meets-Notion of emerging communities, focusing on Africa, Middle East and Europe.
